Anything but artificial.  
AI built for CMOs who  
want to act now—strategic,  
safe, seamless.

Today’s AI creates added complexity and risk for CMOs. It subverts their authority by enabling an explosion of last-mile creative, developed by individual contributors and machines. This generates anxiety for CMOs. The antidote to anxiety is greater control.

ES Klarheit Grotesk Mono extends as an inevitable need to the Klarheit project. A supplementary option oscillating identically between the two initial major standards present in the initial proportional Grotesk family. Klarheit project seeks to meet the requirements of a more contemporary form of modernism, and features a formula that revisits geometrical solutions drawn from the Bauhaus movement as well as key typographic standards used in 1960s Swiss modernism.
